ErgoAnalysis products are designed to provide you with data from your muscles and movements, and suggestions on how to interpret the data, but they are not a replacement of your own judgment and medical advice from your doctor. Your heart rate and other physiological functions are affected by a variety of individual factors that ErgoAnalysis products are not designed to specifically account for, such as (but not limited to) smoking, alcohol consumption, high blood pressure, asthma, and medication or supplements you may be taking.

Your safety is important.
